Get that shot!

"Wide landscape"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/11
Flash:	Off
ISO:	200

Tips: Use a wide angle lens or zoom all the way out to include more of the scene. Set a higher f number to make sure the scene is in focus.

Get that shot!

"Eyeball"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/5.6
Flash:	Off
ISO:	200

Tips: Use Macro mode or a Macro lens to get really close. Position your subject facing a window for beautiful light.

Get that shot!

"Milky Water"

Start with these settings:

Exposure Mode:	Manual (M)
Shutter Speed:	1 sec or longer
Aperture:	f/16
ISO:	100

Tips: Use a tripod or small beanbag to steady your camera for this shot. Use a shutter release cable or the self timer to trigger the shutter. Pressing the shutter with your finger will make the picture blurry.

Get that shot!

"Portrait with bright background"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/11
Flash:	Fill Flash On
ISO:	100

Tips: Use Fill-Flash to throw light on your subject. Try making the flash less obvious by decreasing the flash power in camera settings.

Get that shot! ◯

"Window light portrait"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/4
Flash:	Off
ISO:	400

Tips: Don't go much lower than f/4 because focus will become difficult. Raise the ISO if camera blur is a problem.

Get that shot! ◯

"Silhouette"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/8
Flash:	Off
ISO:	100

Tips: Place your subject in front of a bright light. Meter for the light, not the subject. Use AEL to lock exposure.

"Stop Action"

Start with these settings:

Exposure Mode:	Shutter Priority (S)
Shutter Speed:	1/1000
Flash:	Off
ISO:	400

Tips: Try using manual focus or focus lock to "pre-focus" on the spot where your subject will be.

"Panning"

Start with these settings:

Exposure Mode:	Shutter Priority (S)
Shutter Speed:	1/30
Flash:	Off
ISO:	400

Tips: Move your camera smoothly keeping the subject in the viewfinder. Use continuous focus mode.

Get that shot!

"Bokeh"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/2.8
Flash:	Off
ISO:	100

Tips: Achieve a beautiful blurred background using a low F number. Focus on your subject's eyes.

"Food"

Start with these settings:

Exposure Mode:	Aperture Priority
Aperture:	f/8
Flash:	Off
ISO:	400

Tips: Use raw food as side props. Light your subject from behind or with window light. Mist salads with water.

"Macro"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	f/11
Flash:	Off
ISO:	200

Tips: Use your camera's macro mode or a special macro lens to focus up close. Try shooting outdoors on a bright day.

Get that shot!

"Time lapse"

Start with these settings:

Exposure Mode:	Shutter Priority (S)
Shutter Speed:	2 sec or longer
Flash:	Off
ISO:	100

Tips: Use a slow shutter speed and a tripod to catch light trails. Try shooting right after sunset to get some ambient light in the picture.

"Sunset"

Start with these settings:

Exposure Mode:	Aperture Priority (A)
Aperture:	F/5.6
Flash:	Off
ISO:	200

Tips: Include interesting elements in your picture like the tree below. Use a tripod as the light gets dim.

Get that shot! ○

"Lightning"

Start with these settings:

Exposure Mode:	Manual Mode (M)
Aperture:	f/11
Shutter Speed:	30 seconds
ISO:	200

Tips: Shoot from a safe location! Continuously fire 30 second exposures to have a chance of catching lightning.

Cleverhomeschool.com

Get that shot! ○

"Landscape"

Start with these settings:

Exposure Mode:	Aperture Priority
Aperture:	f/16
Flash:	Off
ISO:	100

Tips: Use a tripod and cable release. Compose so there is something interesting in the foreground, middle, and background. Shoot during the golden hours.
